Meet Kitakids

It's all about the children: from the child-friendly menu to the carefully designed programmes to the purpose built facilities, everything has been lovingly crafted to give your child the best education and care. Our educators are mindfully selected for their warm characteristics to support and protect our family culture and are continuously trained for quality education. Kitakids centres are privately owned and family run, with the owners themselves working on the premises to ensure excellent personalised service, high quality early childhood education and a safe, fun and exciting atmosphere for all children aged 8 weeks to 6 years.

Our Curriculum

Experiences at Kitakids immerse children in thoughtfully devised play-based learning that encourages active experimentation, hands-on experiences and social interactions to help little children attain meaningful learning and build strong foundations. This approach is rooted in the internally recognised Reggio Emilia pedagogy. Based on evidence by renowned developmental psychologist Howard Gardner who believes that children possess diverse intelligences and unique innate natures, we took on a holistic approach to ensure that our teaching employs various forms of instructions. Combined with powerful Accelerated Learning principles to optimise the learning environment, your children will be motivated to expand their perspectives as they develop their potential to learn.

In line with High Scope approach, we work in partnership with parents, to not only enhance your child's development, but to promote your child's learning and provide lasting benefits into adulthood. All our curriculum philosophies and approaches are delivered thematically so that comprehensive and holistic learning takes place.

Our programme:

- Utilises a child's natural curiosity, enthusiasm and intuitiveness.
- Builds on a child's interests and enhances their experiences
- Offers alternatives to explore and discover
- Prepares children for life-long learning

① ALL ABOUT ME E.G. SELF-AWARENESS, CULTURE, DIVERSITY, TRADITION

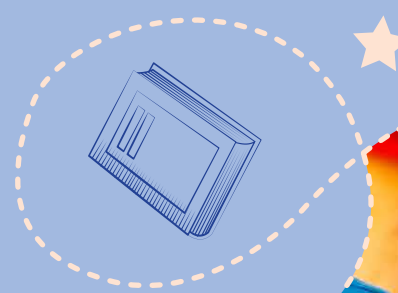

Finding the answers to what makes me "who I am" and "how are other people similar to and different from me" are what enables a child to understand and accept his or her unique individuality. This enables your child to be self-confident and appreciative of people who are different.

② LANGUAGE & LITERACY E.G. READING, WRITING, SOCIAL SKILLS,...

The effective and ethical practice of communication through language, behaviour, sounds, words, and symbols are vital for the advancement of a civilised society and this will set the foundation for your child's learning.

③ THE WORLD AROUND ME E.G. SEEDS, PLANTS, WEATHER, CAMPING, ANIMALS, CONSERVATION, EXTINCTION, POLLUTION

Identifying self, home and events outside our home and how we share our world with different species of animals and plants, will enable your child to learn to protect and care for the environment and teach him or her to refrain from actions that can harm or destroy the world around us.

★ LEARNING AREAS ★

④ NUMBERS E.G. COUNTING, SORTING, GEOMETRY, PATTERNING, GROUPING, + - X /...

Number sense plays a vital role in our environment where objects are numerous and frequently mobile. In order to navigate through it, we make Math and Number Awareness fun and interesting for your child with creative, hands-on activities.

⑤ LET'S INVESTIGATE E.G. SCIENCE, ENGINEERING, INNOVATION, EXPERIMENTATION...

Providing new reasoning to explain the knowledge gathered through observing new phenomena, new actions, or new events and further examining and investigating them through age-appropriate research is a skill that will prove invaluable in the learning journey of your child.

⑥ ART & DESIGN E.G. DRAWING, MOULDING, PAINTING, STORY-TELLING, SCULPTING...

Learning to create and appreciate visual aesthetics is important for the development of your child as it encourages the formation of neural connections during their early years.

⑦ LET'S MOVE! E.G. MUSIC & MOVEMENT, SINGING, DANCING, PERFORMING ARTS, PHYSICAL ACTIVITY

Engaging in physical movement helps your child to enhance the control of their bodies, develop balance, gain spatial awareness, and strengthen fine and gross motor skills.
