

Educating since 1987, Eduwis is a Malaysia's recognised early childhood education group.

Eduwis consists of:

- an early childhood education program,
- monthly teacher's training program, and
- parenting workshop program.

With the combination essence of these programs, we can help children to achieve a comprehensive early childhood development.

Program

1

Integrating 8 different famous educationists' theories & philosophies

Eduwis program is built on the basis of integrating 8 different educationists' theories & philosophies. We combine the best elements in these educationists' theories & philosophies. Through this, Eduwis is able to provide young children a holistic education that focuses on every aspect of a child's development.

For example, we adopted Vygotsky's approach on language development & social interactions between children. While for Erik Erikson who's a famous psychologist, we use his approach to enhance young children's positive emotional development.

2

Thematic integrated learning approach

Thematic integrated learning approach connects all subjects together with an overriding concept. It crosses over subject lines and helps children relate basic academic skills to real world ideas. This approach helps the children to make connections faster and easier during the learning process.

e.g. Theme: Local fruits

- | | |
|-------------------|-----------------|
| - English | - Music |
| - Mandarin | - Drawing |
| - Bahasa Malaysia | - Art & Craft |
| - Early Math | - Moral studies |
| - Early Science | |

All subjects revolve around the same theme for effective learning.

3

More than 1,600 learning activities

There is more than 1600 different learning activities well-designed for the children in this program. Every topic that the children learn will be brought out through different learning activities. To quote the father of kindergarten, Friedrich Froebel, "activities and playing are the highest expression of human development in childhood". Therefore, through this kind of activity based learning, children get to learn in the most meaningful ways. Learning activities are also known as structured play, in which children enjoyed doing the most.

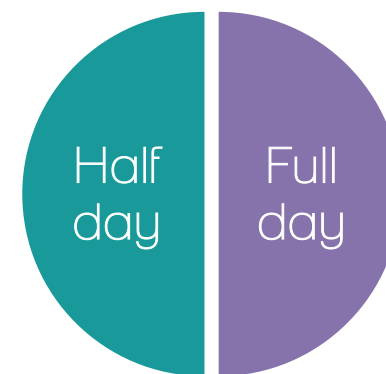

4

Compulsory individual piano learning

Every child in Eduwis learns how to play the piano. The piano lessons are carried out in way where they will have an individual session every school day but just in a short period of time. With that, the children gets to learn and practice daily, while the lessons are kept short in their attention span.

Operations

COMPULSORY SUBJECTS
