# 3D Snowman Christmas Card

You will need:

- Colourful paper
- White card
- Colourful pens
- Scissors
- Glue
- A circular object to draw around
- (Optional) Extra Christmas decorations

1) First, create a snowy scene as the backgroud of your Christmas card. Cut a curved piece of white paper to be the snowy ground, and cut green triangles in a mixture of sizes to represent evergreen trees.

2) Next, get your white card and draw around your circular object. I have used a plastic cup. You will need about six white card circles.
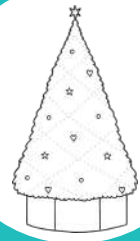

3) Then, cut out your card circles.

4) Put one of the card circles to the side, and fold the rest of the card circles in half.

3D Snowman Christmas Card

5) Put some glue on the back of one half of a folded circle. Match it up with a folded half of one of the other folded circles and press to stick together. Repeat this for all of the folded circles. One you have attached all th folded circles, glue them to the unfolded circle you put to the side earlier.

6) Position your 3D snowman body in your snowy scene and use glue to keep in place.

7) Then cut a smaller circle from white paper or card and glue it above the 3D snowman body. Leave a small gap between the top of the body and the head so you can add a scarf later.

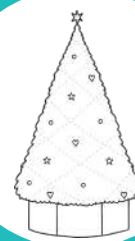

8) Use snips of colourful paper to add a hat, nose and scarf to your snowman.

9) Then use your colourful pens or pencils to add a face to your snowman. You could also choose to add some stick arms using pen.

twinkl

10) Use a light colourful pencil to add a shadow under your snowman so it stands out against the white snowy background.

11) Finally, glue your snowman to some folded card and add any final craft decorations, such as these sparkly snowflakes. You have a beautiful handmade Christmas card - who will you send it to?
